## Index

- $\delta(x)$ , xi
- approximation to the identity, x
- Bessel's inequality, ix
- Central Limit Theorem
  - proof, xxiv
- compact, xviii
- convolution, xi, xxii
- Dirac delta functional, xi
- dot product, vi
- Fejér's Theorem, xii
- Fourier analysis, v
  - basis, v
  - Bessel's inequality, ix
  - coefficient, viii
  - convergence, xii
  - convolution, xxii
  - Dirichlet kernel, xi, xv
  - Fejér kernel, xi
  - Fourier Inversion Formula, xviii
  - Fourier transform, xviii
  - Parseval's inequality, xvi
  - pointwise convergence, xiv
  - Poisson Summation, xix
  - Riemann-Lebesgue Lemma, ix
  - series, ix
  - trigonometric polynomial, xiv
- function
  - Dirac delta, xi
  - even, viii
  - exponential, vi
  - odd, viii
  - orthogonal, vii
  - periodic, v, viii
- geometric series, xi
- Gibbs Phenomenon, xxvi
- heat equation, xxvii
- inner product, vi
- Isoperimetric Inequality, v, xxvii
- kernel, xi
  - Dirichlet, xi
  - Fejér, xi
- Nowhere Differentiable Function, xxvi
- orthogonal, vii
  - orthogonal set, viii
  - orthonormal, viii
- Parseval's Identity, xvi
- periodic, v, viii
- Poisson summation, xix
- probability
  - Central Limit Theorem
    - proof, xxiv
- Schwartz space, xviii
- summation
  - Poisson Summation formula, xix
- techniques
  - adding zero, xvi
  - approximating functions, xix
  - multiplying by one, xii, xv
  - three epsilon proofs, xiv
- uncertainty principle, v
- unit point mass, x
- vibrating string problem, xxvii
- Weierstrass Approximation Theorem, xiv
