

Please join us at the career center on May 2nd at 7pm for a Women in Data cross-career community panel featuring alumni working in social impact, healthcare, technology and finance.

1) Crystal Son ('05), Applied Data Science Manager @ Civis Analytics--Civis indicates it was born on the campaign trail, with CEO Dan Wagner and founding members spearheading the Obama for America analytics team. Since then the DC and Chicago data science teams have seen rapid growth with a steadily developing client base in media, nonprofits, government, healthcare, education, and energy. At Civis Analytics, Crystal reports directly to the CEO and is currently working on expanding the company's portfolio of healthcare sector offerings.

2) Miju Han ('10), Engineering Manager, Data Science @ GitHub--Prior to joining GitHub, she held data product management positions at YouTube, Beats Music, Apple, and TuneIn. Miju's career interests are creating data-driven cultures that encourage creativity and mentoring analysts and data scientist on how to have an impact

3) Rachael Burns ('15), Junior Data Scientist- Modeling and Metadata @ Fannie Mae--Prior to her decision to pursue a career in data technology, Rachael held research internships at the National Republican Senatorial Committee, Wamda Research Lab, and Imprint Capital Advisors.

This event starts at 7pm in the Mears Lewis Room. Snacks will be provided. We hope you can join us.
