Topics to be Discussed

Dow Theory
Barron's Confidence Index
Breadth of the Market
Odd-Lot Index
Charting

Dow Theory

Oldest of the technical theories

Created by Charles H. Dow

- ☛ "There is no way of telling when the top of an advance or the bottom of a decline has been reached until some time after such top or bottom has been made."
 - Major (Primary) uptrend (bull market)
 - Major (Primary) downtrend (bear market)
 - Secondary upward or downward trends
- ☛ Change in direction should be confirmed in some way

Barron's Confidence Index

Based on belief that differential between the returns on quality bonds and bonds of lesser quality will forecast future price movements

- ☛ Calculation

$$\frac{\text{Yield on High Grade}}{\text{Yield on Lesser Grade}}$$

- ☛ Theory
 - during periods of high confidence, investors invest more in lower quality bonds for the added yield
 - increased demand will decrease yield

Breadth of the Market

The more stocks participating in market trend, the greater the indication that decision makers agree on future market prospects

New Highs/Lows for January 9, 2009

The following is a matrix of stocks that have made a new high or low price today sub-categorized by exchange, volume and price.

	Overall	NYSE	AMEX	Nasdaq	OTCBB	Vol > 100K	Vol < 100K	Price > \$10	Price < \$10
<u>20-Day Highs</u>	283	124	43	99	17	141	142	181	102
<u>20-Day Lows</u>	448	169	44	225	10	242	206	216	232
<u>65-Day Highs</u>	117	48	25	38	6	58	59	79	38
<u>65-Day Lows</u>	129	39	14	74	2	79	50	56	73
<u>100-Day Highs</u>	33	9	10	11	3	16	17	21	12
<u>100-Day Lows</u>	118	38	13	65	2	73	45	50	68
<u>52-Week Highs</u>	21	4	9	7	1	10	11	15	6
<u>52-Week Lows</u>	101	35	12	52	2	61	40	40	61

NOTE: Over the Counter Bulletin Board (OTCBB) is a regulated electronic trading service offered by the National Association of Securities Dealers (NASD) that shows real-time quotes, last-sale prices and volume information for over-the-counter (OTC) equity securities. Companies listed on this exchange are required to file current financial statements with the SEC or a banking or insurance regulator. There are no listing requirements, such as those found on the Nasdaq and New York Stock Exchange, for a company to start trading on the OTCBB. It is important to note that companies listed on the OTCBB are not a part of the Nasdaq Exchange. The truth is, OTCBB stocks are not especially large or stable and are considered very risky. As a result, very few OTCBB stocks are successful in making the jump from this market to the Nasdaq or any other major exchange because they are unable to meet the listing requirements. Furthermore, because OTCBB stocks tend to trade infrequently, the bid-ask spread is larger.

Odd-Lot Index

- ☛ Trading on exchanges done only in standard quantities (round lots)
- ☛ Round lot usually 100 shares
 - other quantities are used sometimes
- ☛ Shares less than round lot referred to as odd lots
- ☛ Odd lot trading is considered to reflect investment decisions of small investors
 - analysts consider odd lot investors to be wrong in the market

NYSE Daily Statistics
Odd Lot Activity

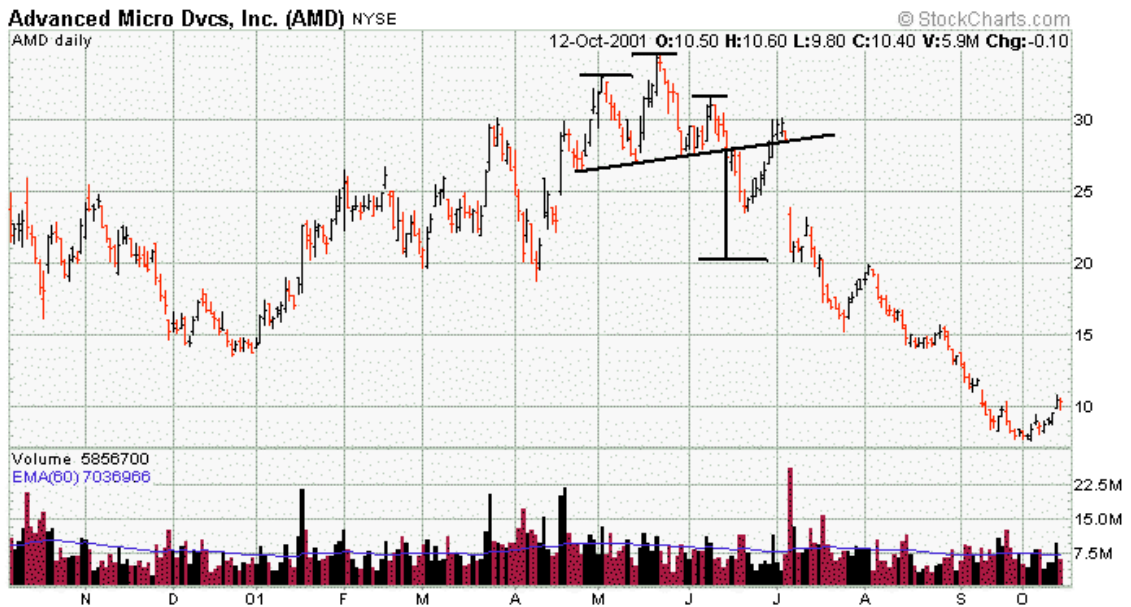

Trade date	1/15/2009
Purchases (shares)	7,178,217
Short sales (shares)	2,296,246
Other sales (shares)	5,048,610
Total sales (shares)	7,344,856

Head and Shoulders Formation

Charting (continued)

In 1996, Shi Zhang wrote a program based on the description of the head-and-shoulders formation. Zhang's program looked for six points on a bearish head and shoulders pattern -- the right shoulder, the right trough, the head, the left trough, the left shoulder and "neckline" crossing. The time between points had to be at least five days and no longer than 180 days. Various distances were used to make sure that no patterns were missed. After running his computer nonstop for 10 hours, Zhang came up with seven patterns, which he then evaluated for profitability 1, 2, 3, 4, 5, 10, 20, 30 and 60 days out. The results appear below:

Number of days after neckline crossing

	1	2	3	4	5	10	20	30	60
Average profit/loss	0.3%	1.6%	1.2%	1.1%	1.3%	-0.7%	0.7%	-0.2%	-2.6%
Standard Deviation	0.01	0.03	0.01	0.02	0.02	0.02	0.02	0.04	0.1

We conclude that head-and-shoulders trading does not work either as a signal of a trend change or as a profitable strategy.
