Sources: In addition to the sources listed above, most of the information in the table was obtained from the National Governors’ Association “State Children’s Health Insurance Program Plan Summaries” website: http://www.nga.org/center/divisions/1,1188,T_CEN_HES^C_ISSUE_BRIEF^D_1287,00.html and from the Health Care Financing Administration’s “State Children’s Health Insurance Program Approved Plan Files” website: <http://www.hcfa.gov/init/chpa-map.htm>. The source for column 6 is Health Care Financing Administration (2001).

¹Enrollment figures are the unduplicated number of children ever enrolled in the program during the year. For states with combination programs, the figures are the sum of the number of children ever enrolled in the Medicaid expansion program and the number ever enrolled in the separate state program. Because children may be enrolled in both programs during the year, there may be some double counting of children in those states.

²Since virtually all states report engaging in new publicity efforts, to save space this outreach activity is not mentioned in this column unless unusual (e.g. multilingual publicity).
